Datawrite Reds seem to be well recieved by my E55 although not completely faultlessly. The cheap machines only just last the warranty before getting picky and often die at around two years. Perhaps Panasonic thought this was so obvious they didn't even put this in the directions. REFER SERVICING TO QUALIFIED PERSONNEL. That's just a guess. Upping the current to the laser will sometimes help, but usually spell the death of an old laser. At first I thought the patch that Jpratt spoke of didn't work as I too got a usupport message. for all input to the E55 I use the front AV3 , for camcorder,vhs video and input from a portable dvd player , and havent had a problem Laser life is something I've been looking at over the last few years. Before connecting, operating or adjusting this product, please read these instructions completely.Please keep this manual for future reference. Page 2 9) Do not defeat the safety purpose of the polarized or grounding-type plug. It appears to be a problem relating to the machine's laser and the DVD-R media. Thanks, Kim Kim, I went on the site and found the link- it's still there. A polarized plug has two blades with one wider than the other. Thanks for listening & here's hoping I don't break any rules. No problems with that project. These limits are designed to provide reasonable protection against harmful interference in a residential installation. They didn't say that in the directions. 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus. Hit enter. I've had a Philips DVDR70 machine and it also slowly got pickier with disks as I used it. I bought a machine about the same time as Jpratt so I thought I'd pass on my experience-there's a good chance our firmware was about the same vintage. It will play back fine, unfinalized but I'd like to be able to play it back on other dvr players. Such disks are hard to find, so I tried a pack of 25 TDK DVD-R 4.7GB 1-8X disks. Other brands of DVDs (Fuji and Maxell) appear to work flawlessly again. I also searched for the firmware upgrade mentioned previously and that doesn't turn up iether. Hope this helps someone out there. A grounding-type plug has two blades and a third grounding prong. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped. It is a superb machine, and in my opinion the best on the market. Since the problems using 8x disks I have stuck to 4x. Thanks for any help you can give. FCC Caution: To assure continued compliance, follow the attached installation instructions and use only shielded interface cables when connecting to peripheral devices. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. panasonic recorders dont like cheap disks simple as heres the safe list panasonic DVD-R, panasonic DVD-RAM MAXELL, DVD-R MAXELL, DVD-RAM VERBATIM DVD-R There may be others that work but your warranty may not cover you for any other then panasonic disks the cheaper the disk the more likely it will fail you may find infinity samani disk are a cheap option with good results these are usally very reliable in panasonics but not ones that have been affected by other cheap media if you have used several no make discs that have caused crashing you will find it can cause better media to crash an evently hardware failer so take out the warranty an if this happens make sure you say your machine has only ever had panasonic DVD-RAM an DVD-R DONT MENTION ANY OTHERS YOU'VE USED as they can say its your fault for using cheap disks of course avoiding the wrong disc can save this ever happining aviod " Data safe yellow top , red top. Is there something I'm not doing correctly? Thanks- JP This forum has been most helpful in trying to solve/understand the problem with my panasonic e55. Not one single disk in the first batch failed to record perfectly and they work out at A£0.14 each. PLEASE let me know if anyone that finds a way to make this work for your DMR E55. However, there is no guarantee that interference will not occur in a particular installation. pDISPOSE OF BATTERIES IN AN ENVIRONMENTALLY FRIENDLY MANNER. I tried cleaning my laser and this did not correct the problem at all. Since I've already compiled these from vhs to vhs tape w/o problems, I'm assuming copy protection is not an issue here. next page – I have been having the same problem with my E55, and the problem seems to be gradually getting worse. When I first tried it it failed because I hadn't double clicked on the patch and extracted the correct file. Best of luck! And...thanks to rskeeba for the tip on which file to copy - apparently you were not the only one that missed this step (that is not included in the instructions). grey top, titanium, prince disks, unbranded DVD-R, maplin unbranded DVD-R thats a few there will be more so be careful!! I archive a lot of home compilation music tapes to dvd and have only had this problem a couple of times, both caused by the same point of the same video track but at different stages on the dvd ie the first failure near the end, the second near the start . Operating Instructions DVD Video Recorder Model No. DMR-E55 Dear customer Thank you for purchasing this product. I just don't think the laser units are any good in these stand-alone recorders. I enede up going to Taiyo yuden to get an 8x disc that worked( both record and play). You copy it onto a CD-R and then play it in your machine. I hope the new Blue ray ones are better. THE FOLLOWING APPLIES ONLY IN THE U.S.A. FCC Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. This worked for me. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet. Had the same problem with my machine here in the UK. Now please forgive me if what I'm about to say was blatantly obvious to everyone but me. It looks like this: DMR-E55.EXE], 946kb Version DK-091 Last Updated 9/30/2005 Description Updates RAM / DVD drive and improves compatibility with the most recent 8X and 16X DVD media. Try using this If that doesn't get you there, go to www.panasonic.com then click on search, then check the "professional Video" box and type "firmware" in the search box. Overall, expect to replace a decent quality machine around every three years and the cheap ones, well that's down to luck. I tried to run the firmware update as described above but when the disk is inserted, i just get the message "UNSUPPORT", and obviously no change, - I still cannot record on the TDK DVD-R 4.7GB 1-8X disks... Actually, I think the software update must be for the North American Market, as there is no firmware update on the European sites. That's bullocks. always failing before the patch). It still chokes on Cicero brands DVDs sometimes (vs. When I go back and read their directions, I maintain they are misleading. if you purchase a dvd-cd cleaner it will resolve the problem. I recently got a fantastic deal on 200 DVD-R disks. Comments please GC Hello, I have a problem recording on the e55, as well. The Datawrite Yellows using Ritek G04 dye worked fairly well, as did 4x Ridisk's but I've had almost no luck with the new 8x G05 dye due to any disk brand on the E55. 14) Refer all servicing to qualified service personnel. I would use av2 input as advised in an earlier post. For optimum performance and safety, please read these instructions carefully. If you go to www.panasonic.com and then search for firmware, you will find the patch. Click the download button. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Thanks so much for the information! Kim The instructions of the DMR-E55 state that they support DVD-R with a recording speed of 1X to 4X. I will also try the patch. Everything seems ok for about 30 seconds, then the Panasonic displays the "self-checking" message & says "bye" or "replace the disc." The source material is a compilation of music videos I compiled from promo music video tapes sent by record labels. The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the ap-pliance. I put it down to something in the signal the recorder didnt like. Obviously, not the recommended speed. pDO NOT OBSTRUCT THE UNIT'S VENTILATION OPENINGS WITH NEWSPAPERS, TABLECLOTHS, CURTAINS, AND SIMILAR ITEMS. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Basically, the same setup I used to archive some cartoons from laser disc. WARNING: TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR PRODUCT DAMAGE, DO NOT EXPOSE THIS APPARATUS TO RAIN, MOISTURE, DRIPPING OR SPLASHING AND THAT NO OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, SHALL BE PLACED ON THE APPARATUS. The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of suffi-cient magnitude to constitute a risk of electric shock to persons. 13) Unplug this apparatus during lightning storms or when unused for long periods of time. Bob According to the diagrams in my E55 manual AV1 is customarily used to output the signal to the TV with AV2 being used as the input channel i.e. connected to the VCR. Currently on my second batch of 50 ritek G04's purchased form www.ukdvd-r.co.uk. CAUTION! THIS PRODUCT UTILIZES A LASER.USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.DO NOT OPEN COVERS AND DO NOT REPAIR YOURSELF. I called Panasonic and they said that the issue was with the recording speed of the new disks. The disk reports as ready. you record, about 30 seconds of recording later the machine shuts down with nothing actually recorded on the disk! I think a memory buffer is perhaps being used during the 30 seconds and the machine gives up when it's full (because no writing to the disk to empty it could take place). I have a DMR- e55 and have had it for over a year now. I wanted to put two recordings on 1 disk. I've successfully recorded > 100 other discs all on the same media (maxell-r in library cases). after three years they become weak and picky about the disc's used. CAUTION CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE SCREWS.NO USER-SERVICEABLE PARTSINSIDE.REFER SERVICING TO QUALIFIEDSERVICE PERSONNEL. THE FOLLOWING APPLIES ONLY IN THE U.S.A. Note to CATV system installer: This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical. When I went to record on them I had the same issues as have been described in this forum. Some of the better machines (DVD recorder stand alone's and puter burners) are worth repairing if the parts are available, but unfortunately not viable in a workshop as the time involved to fit a re set up the laser units is more expensive than a new machine! Some of them are damn near impossible to set up again, because the manufacturers wont release the parameters or manuals. www.panasonic.com doesn't either. Once I did this the patch worked very well. Obviously this isn't very scientific, but never the less a careful long term observation from repairing DVD players etc. Choose "Panasonic Product Support - DVD Firmware" This will take you to a page of downloadable updates. You will see a list of options. Computer drives are about the same, the better quality drives last longer. In particular, try Mirror Platinum Pro 4x discs if you can get them - my problems disappeared with these DVD-R's. Has anyone else experienced this. the only problem is you have clean it evry week. 11) Only use attachments/accessories specified by the manufacturer. Any suggestions about the 2 on 1 disk problem? No luck so far but do I need to finalise the disk before trying to transfer to HDD?. I have Nero software which came with the LG writer I am brand new to the forum and just wanted to say thanks for this thread. ENSURE THE UNIT IS WELL VENTILATED. Has anyone had a similar problem? TO PREVENT RISK OF ELECTRIC SHOCK OR FIRE HAZARD DUE TO OVERHEATING, ENSURE THAT CURTAINS AND ANY OTHER MATERIALS DO NOT OBSTRUCT THE VENTILATION VENTS. I use RiDisc Xtreme 8x DVD-R in both my pc dvd writer and my panasonic. These are reliable discs and rarely fail. Once you double click on it it extracts the actual file that is supposed to be copied onto a blank CD-R. About half way down the list you will find the DMR E55. The manual doesn't address this. It won't finalize the disk. Didn't notice that the TDK and Samsung -R's were x8 whereas my first batch of Sony disks were x4...So I will be trying to get some x4's though availability doesn't seem so good. Price is of no influence here. I have the DMR E55 and have owned it since December of 04. I hate to have to take these DVD-R's back. The new TDK's are 8X. My problem with my dmr-e55 is that record from cable on channel A2, however last night I recorded a film from BBC4 and afer approx 5 minutes the picture went off leaving the sound only.I changed channel on my tv remote and the picture was still there, but not on the dvd.The picture returned after about 15 minutes. This device complies with Part 15 of the FCC Rules. Try using 4x speed media. The wide blade or the third prong are provided for your safety. 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. My DMR-E55 recorder first started out not wanting to finalize disks and then freaked out anytime I put in any DVD-R, even ones that had worked in the past. What do members think on the ideal and correct connections between tv-dvdr and cable. pConsult the dealer or an experienced radio/TV technician for help. You could give this configuration a try. The patch panasonic offers for download is apparently a compressed file. I'd echo the comments of previous post about how over time the machine just can't seem to handle certain brands of DVDs. Mine was getting so bad that even brands of DVDs that previously worked were starting to cause the machine to pack it in 100% of the time. Jpratt I've got the update and I expect that this will solve the problem. In fact, I searched on the model and it doesn't turn up anything. I am trying to archive some hifi vhs music video compilations w/the Panasonic DMR-E55 & seem to have hit a brick wall. The Wordperfect file is the actual update file that you copy to your CD. I couldn't get mine to work - It would flash "UNSUPPORT" which either means that the disk did not work or that the machine you have does not need the upgrade. I updated the firmware, and now all is well! Hi I'm a new member and have just come across the panasonic dvdr section. I first got this problem when using 8x media a couple of months after buying the machine (no, I can't get a product replacement because I violated the guarantee getting a jammed disk out of my machine! Agh!). I have problems with expensive Maxell DVD+R discs, but never had any problem with a very cheap brandless type of DVDR on the same recorder. Yup the solid state lasers have a very short life span, too short if you ask me. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:pReorient or relocate the receiving antenna.pIncrease the separation between the equipment and receiver.pConnect the equipment into an outlet on a circuit different from that to which the receiver is connected. Media is Fuji 8x dvd-r blanks. The machine appears to work almost flawlessly. My setup is fairly simple: Sansui hifi vcr into line 1 of Panasonic recorder; Panasonic recorder out to monitor. I'd try teaking up the laser current as on a Playstation if I could, but there is no obvious way to do this - I suspect it's controlled in software through a secret installation menu. Then insert the CD into your E55 (following the instructions) and it should work like a champ! I can now record on 4x, 8x, or 16x DVD -R media. It seems the best quality machines lasers last around 4 years with average use. Once it is downloaded be sure you do as rskeeba said in the thread above and extract the instructions, the license agreement and the Wordperfect file. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over. I love the machine. PC DVD writers seem to be made of much better stuff! TWP (Options set to not receive emails) likewise, I didnt find a G05 8x dye disc that would record well or playback on the E55. That's the way I've used it to copy VHS off-air archives without any problems. I start the Panasonic dvd recorder & then i roll the vhs tape.
